

FinTrack - Smart Personal Finance & Expense Tracking App

Problem Statement

- Users perform multiple digital transactions daily using UPI, cards, and wallets.
- They lack clarity on where their money is being spent.
- They do not clearly know how much monthly budget remains.
- They struggle to identify which categories consume the most money.

Solution Overview

FinTrack is a smart mobile application designed to provide instant financial clarity. It enables quick expense entry, monthly summaries, category-wise analytics, and simple profile management. The design focuses on usability, clarity, minimal friction, and trust-based visual design principles.

User Flow

- Splash Screen
- Login / Sign-Up
- Dashboard (Monthly Overview)
- Add Expense
- Monthly Analytics
- Profile & Settings

Key Design Decisions

- Color Psychology: Dark navy for trust, green for savings, red for alerts.
- Dashboard Priority: Highlights total expenses, remaining budget, and progress bar.
- Minimal Add Expense Screen: Large amount field with category icons.
- Visual Analytics: Charts used instead of raw numbers for clarity.
- Consistent UI System: Rounded cards, soft shadows, and clear typography.
